-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. **Claim 11** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant claims “an annular slot” however it is unclear from the drawings what the applicant is referring to.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claims 1-12** are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (US 637028).

Smith discloses a centrifuge tube for dispensing urine or serum/ processing biomolecules. The separation device (50) comprises a separation column (142) that has a top side inlet (146) and a bottom side outlet (144) and in which separation material is arranged, as well as with a collection vessel (50) for collecting the liquid exiting from the outlet (144), where in the separation column is inserted into the collection vessel (50) and is closed off with a removable cover (44). (See Fig. 20) The separation column (142) has an edge flange (40) that is pressed onto the collection

vessel (50) by means of the cover (40). (See Fig. 20) Smith discloses the interior of the collection vessel and the separation column has pressure-equalizing connections/channels (55) in addition to the outlet from the separation column. (Col. 11, Lines 44-47) In Figure 20, the edge flange lies on the upper edge of the collection vessel (50). With regards to Claim 12, it appears that the volume enclosed by the collection vessel (50) beneath the lower end of the outlet (144) of the separation column (142) is at least 1.5 times as large as the free volume of the separation column.
